

MAKE A DIFFERENCE IN ALL WE DO

In this picture we see flowers of the same family but blooming differently. We find it to be a call for us to make a difference in all we do, to promote life in the midst of limitations. In order to make a difference in all we do, it is a call for us to unite as one family, to work together and to build together as a family. This is what we see on this picture: the flowers of the same family blooming in different colors on the same ground and same soil. This brings up a beautiful environment, when seeing it we admire it. It is God's call for us to share our differences in a way that we inspire the world.

A call to accept one another as we are so that we may make difference in all we do. It is the wish of every human being to create a world of change not of routine. This becomes a call for us to create a room within our hearts to accept this change when it comes to us. We are different in seeing things and life, we belong to different backgrounds and different nationalities but, we are called, as Holy Cross Sisters internationally, to live together with our differences. Our second picture is a piece of creative work on paper. It is made up of different colours but forming the same pattern.

With it we see a beautiful decorative form.

In life there is a call to have a vision. We cannot remain the same but we are called to move on and make a difference. In our mission to promote a step towards transformation we search ways to education among the youth using simple instruments, for example, making and promoting handi-crafts, training for interior decorating, making jewelley, garments, ect. By this we hope to promote life in the young and create healthy and creative occupations for them. It can be used as a means of promoting socialisation, where we come together to know each other and share our giftedness.

It can also enrich the value of communication as we work together.

Thank you

Presentation by Sisters Apolonia A. Deka (Southern Africa); Adelina Mbaka (Zambia); Agnes Zingkhai (North India); Anjali Balaraju (South India) and Sujivini T. Croos (Sri Lanka).
